

Addition – Counting on

$$48 + 36 = 84$$

- First, draw a number line starting at 48.
- Then partition 36 and write each part on the number line.
- Finally, use the number line to add each part onto 48.
48 add 10 equals 58. 58 add 10 equals 68. 68 add 10 equals 78. 78 add 6 equals 84.
- So 48 add 36 equals 84.
