

Multiplication – Grid method

$$7 \times 38 = 266$$

x	7
30	210
8	56
	266

- First, partition 38 into numbers which are easier to multiply. Write each part in a grid.
- Then multiply each part by 7.
30 x 7 equals 210. 8 x 7 equals 56.
- Finally, add the two products.
210 + 56 = 266.
- So 7 multiplied by 38 equals 266.
